OCCASIONAL PAPER NO. 19

Ottoman Numismatics - a Bibliography of  
Yugoslav Sources

by Ranko Mandić

Introduction

Information on numismatic studies that are written in unfamiliar languages is difficult to come by for most ONS members. This paper is intended to ease access to Yugoslavian sources for people interested in Ottoman numismatics.

The bibliography aims to list all papers on the production and use of Ottoman coins that have been published in Yugoslavia or by Yugoslavian authors. A few works by other authors are included that are relevant to the study of Ottoman coins from the territories now called Yugoslavia. Standard catalogues have however been excluded. It should be noted that mint names are given in Serbo-Croat but titles in Serbo-Croat have been translated into English.

This is the first bibliography on this subject known to the author. He would therefore be glad to hear of suggestions from members of additions or corrections.

Bibliography

- 1) Barjaktarović, Fehim: Review in Serbo-Croat of the BIBLIOGRAPHY OF MUSLEM NUMISMATICS by L.A. MAYER - (Prilozi za orjentalnu filozofiju i istoriju jugoslovenskih naroda, Sarajevo, Vol. 6-7, 1956-57).
